Subject: FW: Follow up on Emanuel Tire Company visit

Hey again,

See the highlighted companies below. This list may be useful as you look for processing facilities that make the tire crumb. We already know of some, but there are others that are new to me, at least.

Jackie,

It was our pleasure to host you and introduce you to our world of tire recycling.

As for crumb rubber producers, these are my suggestions:

Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]

Ex. 6 Personal Privacy (PP)

Some near, some far, but all long time players in the tire recycling to crumb rubber business.

I hope that this helps. If we can be of any other assistance, please do not hesitate to contact us.

Best,

Ted

Hi Ted,

It was great to meet you during th [REDACTED] visit a few weeks ago. I think we learned a lot and we were appreciative of the time that everyone took to show us the facility and the process. After the visit, we talked about potential processing facilities where we might be able to collect samples of tire crumb used for synthetic turf infill. We hope to vis [REDACTED] in Houston, and we can ask them directly. But if you know of any other companies that we could contact to ask if we can collect samples, please send them along. We were hoping th [REDACTED] would be a possibility, but unfortunately, they don't process their material into tire crumb directly.

Also, if you have any questions for me, don't hesitate to ask. Thanks.

Jackie
